Status: Final

Vision

To be an innovative, sustainable model of academic excellence that creates well-rounded, lifelong learners and global citizens.

Mission

To offer intense math, science and technology experiences and challenging opportunities in the arts and humanities. To develop lifelong learning skills, including critical thinking, leadership skills, volunteerism and collaboration with peers.

- MSA will foster a safe environment where every voice is heard and individuals are free to take risks.
- MSA will continue to improve performance and recognize outstanding achievement.
- MSA will empower students to develop skills in organization, time management and self-discipline.

Core Values

- MSA will continuously evaluate and improve our program to ensure the highest quality of education.
- MSA will encourage networking, collaboration, and open communication between all members of our community.
- MSA will encourage students and staff to show respect for others and their views.
- MSA students and staff will exhibit fairness, cooperation, integrity and honesty.
- MSA students and staff will take responsibility for their actions.
- MSA will encourage students, their parents and staff to volunteer at school.
- MSA will set high expectations for teaching and learning.

Background

The 2010 Math and Science Academy (MSA) Board of Directors (BOD) created this Strategic Plan for the primary purpose of guiding the long-term viability of the school and to align our specific written goals with our Vision. The 2010-2011 plan had outlined two possible options for the continuous operation and sustainability of the school – continue to use the existing facilities (which would not have the ability to increase enrollment in the future) or build a new building (which would allow the ability to increase enrollment, if needed). MSA continues to have a strong enrollment waiting list of prospective students growing every year.

MSA had outgrown its original building and in 2010, signed a three year lease on an additional building across the street from the main building. After a careful and thorough review, in 2012, MSA decided to build a new building in the vacant lot adjacent to the current building and vacate the second building at the end of the three year lease. The building construction is expected to be completed in August 2013 and it will be in use starting with school year 2013-14. With the completion of the new building, MSA will have its own gymnasium and music room with additional classrooms.

Review and Assessment

The BOD will review this strategic plan and assess and revise it as needed at the completion of each academic year.

Overview

The BOD identified eight key areas of focus: *Enrollment, Finance, Facilities, Annual Funding Sources, Staffing, Academics, Communication and Technology.*

The following sections will elaborate on these eight key areas.

Enrollment

Vision: To be an innovative, sustainable model of academic excellence that creates well-rounded, lifelong learners, and global citizens.

MSA's small size could very well be its greatest asset. MSA understands that small schools can offer personalized instruction, an atmosphere of ownership (for both staff and students), and foster a safe environment. When a school population exceeds 500 students, it tends to lose the feel of a small school.

MSA's building capacity, based on current fire codes for the two buildings, is set at 290 students for Building A (8430) and 324 students for Building B (8460).

Historically, some students have elected to leave MSA at the completion of 8th and 9th grade, for several reasons, the most frequently cited reasons being:

- Desire to pursue classes available at other schools.
- Involvement in athletics not available at MSA.
- Academically not successful at MSA, and therefore elect to attend a school that has different graduation requirements.

MSA's Director has been charged with the task of improving student retention in these grades. To that end, in the 2014-15 school year more electives have been offered and MSA is working toward increasing the variety of core classes, and incorporating more AP classes when viable.

As long as it is financially viable, MSA will target an average student to teacher ratio of 20-22:1, which is calculated by the number of MSA students, excluding the PSEO students, divided by the number of non-Special Education teachers.

Enrollment (Continued)

Goals	Support for the Vision	Owner
Remain a small school by capping enrollment at 450 students, excluding PSEO students and contingent on facilities.	It is MSA's opinion that academic excellence is best achieved in small schools. Supported by: BOD Finance Committee Director	BODDirectorMSA staff
Maintain the Enrollment Forecast spreadsheet that shows the number of students in each grade for the next five years.	This is MSA's plan for achieving the sustainable model of academic excellence. Supported by: Director Finance Committee Director	BODDirectorMSA staff

Facilities

Vision: To be an innovative, sustainable model of academic excellence that creates well-rounded, lifelong learners, and global citizens.

MSA's original building at 8430 Woodbury Crossing is leased from the MSA Building Company. A second building is also being leased by MSA Building Company that was completed September 2013. The original building will house 8^{th} - 12^{th} graders and the second building houses 6^{th} and 7^{th} graders.

Challenges

Our biggest challenge will be to keep enrollment at a level that will allow us to maintain both buildings.

Goals	Support for the Vision	Owner
Ensure that the space of the two buildings is best utilized to provide adequate space for students to learn.	Sustainable model of academic excellence Supported by: Director Teachers	BODBuilding/Safety Committee
Ensure that both buildings have the necessary infrastructure and amenities that allow the facilities to be used to their full potential.	Sustainable model of academic excellence Supported by: Director Teachers	BODBuilding/Safety Committee
Ensure that funds are available to repair and update the old building to provide an adequate and safe learning environment.	Sustainable model of academic excellence Supported by: Director Teachers	BODBuilding/SafetyCommittee

Financing

Vision: To be an innovative, sustainable model of academic excellence that creates well-rounded, lifelong learners, and global citizens.

Since MSA opened in 1999, enrollment has increased every year. Initially, this growth was planned to fully populate the school in grades 6-12. More recently, the student population was forced to grow in order to keep the school financially solvent. Enrollment eventually exceeded the existing facility's capacity, so additional classrooms, as well as a gymnasium, was completed September 2013. The combined facilities should provide sufficient space to accommodate the enrollment needed to balance the school's budget for at least five years. See Appendix A for budget projections.

Challenges

Unchecked Enrollment Growth

The majority of the school's revenue comes from the State of Minnesota and is based on the number of Adjusted Pupil Units. Because increases to State aid did not keep up with inflation, MSA frequently increased enrollment to meet increased costs. If future State funding does not increase sufficiently, and if alternative sources of funding are not found, eventually, the school's facilities will not be able hold enough students to balance its budgets. In addition, this increase in student population will cause the school to get larger than most students, teachers, or parents want. The intimacy of a small school will be lost.

Sources of Revenue for Charter Schools

Unlike traditional public schools, charter schools cannot levy taxes. This means charter schools continue to experience a disproportionate financial challenge compared to traditional public schools. The staff of MSA, along with other charter schools, will continue to lobby legislators to increase funding to charter schools. In addition, the MSA BOD has created an Annual Fund Committee to search out and obtain new sources of revenue. Either, or both, approaches must be successful if MSA expects to continue submitting annual audited financial statements that result in positive fund balances.

Goal	Support for the Vision	Owner
Ensure that each yearly budget results in a surplus, or if it must be in deficit, then a plan must be in place to ensure that the issues causing the deficit are resolved.	Sustainable model of excellence Supported by: Treasurer Director	BODFinance Committee

Annual Funding Sources

Vision: To be an innovative, sustainable model of academic excellence that creates well-rounded, lifelong learners, and global citizens.

The mission of the Math and Science Academy Alternative Funding Committee is to keep MSA students focused on academics, and to rely on the gracious support of our parents, alumni and community members to participate in fundraising with the school. The results of these efforts will provide students with innovative and hands-on experiences so that MSA can continue on its path of academic excellence.

Focus

- Upgrade old and new buildings
- Course Expenses outside of budget

Goals	Support for the Vision	Owner
 Establish Annual Fund Engage MSA community in fundraising through contact with fundraising vehicle. Continue Give to the Max as the main fundraising vehicle. Reestablish connections with alumni. Develop a greater community outreach. Gather and analyze past and current data regarding school-related fundraising efforts to maximize MSA's overall alternative funding strategies. 	Academic excellence Supported by: • Annual Fund Committee • Finance Committee • MSA Community • Director	 Annual Fund Committee Alumni Committee

Staffing

Vision: To be an innovative, sustainable model of academic excellence that creates well-rounded, lifelong learners, and global citizens.

From a budgeting standpoint, it is critical that MSA continues to hire teachers and administrative staff as needed to support student success.

Goals	Support for the Vision	Owner
MSA will target an average student to teacher ratio of 20-22:1	Sustainable model of education Supported by:	BODDirector
	Finance CommitteeDepartments	
Ensure that teachers' licensures will adequately cover the projected student population.	Sustainable model of education Supported by: • Departments	BODDirector
Ensure that teachers are qualified and meet the growing needs of MSA's expanding curriculum.	Academic excellence Supported by: • Departments	BODDirector
Ensure that teachers receive competitive pay and benefits.	Sustainable model of education Supported by: • Finance Committee	• Director

Academics

Vision: To be an innovative, sustainable model of academic excellence that creates well-rounded, life-long learners, and global citizens.

MSA's academics are both rigorous and varied. Individual teachers and departments create the curriculum, with significant changes being approved by the BOD. The curriculum emphasizes problem solving and critical thinking, as well as research and evaluation. This has created a program that encompasses a school-wide writing standard (MLA) as well as graduation requirements that exceed state and national standards in Math and Science. (See *Math & Science Academy High School Profile MSA Course Requirements* located on the school website www.mnmsa.org)

All of this has led to continuous success as evidenced by MSA students consistently scoring among the best in the state and in the country on standardized tests such as the MCAs and ACT.

Goals	Support for the Vision	Owner
Continue to provide and expand college credit options such as Advanced Placement (AP) courses and/or College in the Schools (CIS) courses in all core areas.	Academic excellence Supported by: • Finance-Committee • Academics Committee • Director	• Departments
Maintain superior test scores on state required standardized tests.	Academic excellence Supported by: • Director	• Departments
Ensure ongoing innovation in the classroom through the use of technology and current educational advancement and staff development.	Innovation Supported by: • Finance Committee • Technology Committee • Director	Departments

Academics (Continued)

Goals	Support for the Vision	Owner
Work to develop students into lifelong learners and global citizens through curriculum selection and course offerings.	Create life-long learners Supported by: • Director	Departments
Continue to provide support and information for students interested in enrolling in PSEO.	Academic excellence and create life-long learners Supported by: • Director	Assistant Director

Communication

Vision: To be an innovative, sustainable model of academic excellence that creates well-rounded, life-long learners, and global citizens.

Since the Math and Science Academy (MSA) completed the building expansion project, it is critical that MSA create community awareness of the expanded facility as well as increased communication of overall school successes. These efforts are primarily for public relations. In addition, increased communication with the community could create sustainable community partnerships and open new avenues for funding and beyond. Communication would be integrated into the overall strategic plan as appropriate.

Challenge: MSA is not consistently viewed as being a primary stakeholder in the community.

Goals	Support for the Vision	Owner
Create increased community awareness through a detailed communication plan.	Promote MSA's sustainable model of excellence. Supported by: • Annual Fund Committee • Director	 BOD members and committees as appropriate Director
Seek out and sustain community partnerships to provide opportunities for students and staff to grow as community leaders.	Create well-rounded lifelong learners and global citizens. Supported by: Annual Fund Committee Director	BOD as appropriateDirector

Opportunities

- Local Business Internship/Mentor Programs
- Press Release / Media Relationships
- Woodbury Chamber of Commerce Partnerships

Technology

Vision: To be an innovative, sustainable model of academic excellence that creates well-rounded, lifelong learners, and global citizens.

The Technology Committee will work with MSA staff, students and parents in providing access and instruction on the technology needed to support MSA's curriculum. Technology is no longer just support behind the scenes. Today and in the future, prepared students must be proficient in computer programs used in college classes and the workforce. In addition MSA will strive to give students access to scientific technology such as the Fab Lab.

The Technology Committee will work with the Budget Committee and the Alternative Funding Committee to ensure that technology needs are communicated and a plan is in place to provide funding.

Goals	Support for the Vision	Owner
Sustain and enhance the 1:1 laptop program.	Sustainable Model of Excellence Supported by: • MSA Community	Technology Committee
Provide fixed asset technology for both buildings. This includes adequate Wi-Fi for concurrent use for all staff and students, whiteboards, projectors, telephone system and printers	Sustainable Model of Excellence Supported by: • Finance Committee	Technology Committee
Assist in incorporating technology within coursework whether in support of the subject, or as the subject, such as Computer Programming and Engineering.	Academic Excellence Supported by: Departments Academics Committee	 Technology Committee Departments Academic Committee

Technology (Continued)

Goals	Support for the Vision	Owner
Professional development for staff on what technology is applicable and how to use it.	Academic Excellence Supported by: MSA Staff Departments	Technology CommitteeMSA Staff
On-going design and upkeep of MSA website.	Sustainable Model of Excellence Supported by: • MSA Staff • Communication Committee	Communication Committee
