

## 2008-2009 Annual Report

TOP PERFORMING
2009

Vision:
To be a model of education that anticipates needs and prepares students for excellence

Mission:
A community created and operated school that provides high expectations for all students.

## Governance

MSA is governed by a board of directors (BOD) that is comprised of four parents, five teachers, one non-voting student representative, and the director as an ex-officio member. According to MSA by-laws, an election is held each year in November (the actual date is set by the BOD on the recommendation of the BOD election committee). Approximately half of the board is up for election with newly elected members being seated at the first meeting in January of the following year. MSA board meetings are held on the first Thursday of each month. There are eight standing committees (viz. budget, building maintenance, enrollment, personnel, technology, parent team, policy, and new for this year, fundraising) that meet either the second or third Thursday of the month. The MSA BOD routinely conducts workshops to address the larger issues, and thereby gives the community a chance to participate on such issues. The 2008-2009 board members are listed below.

| Name | Position and Term Expiration | Group Representation |
| :---: | :---: | :---: |
| Anil Mehta (651) 265-5044 anil.mehta@gtservicing.com | Board Member - 12/31/08 | Parents |

## Teaching Staff Information

For the 2008-2009 school year, $100 \%$ of the MSA teaching staff were recognized as highly qualified and fully licensed. In addition the administrative staff, specifically the director, holds a current K-12 administrative licensed.

| Name | File <br> Folder \# | Licensure Area | 08-09 Teaching Assignment(s) |

## Finances

According to our FY 09 Audit Opinion: The financial statements are fairly stated, and the Math and Science Academy was issued what is known as a "clean" audit report.
The Yellow Book Opinion: No compliance issues were noted during the review of laws, regulations, contracts, grant agreements or other matters that could have significant financial implications to the School.
For Legal Compliance: No compliance issues were reported with respect to Minnesota Statutes related to charter schools and UFARS accounting.
Fund Balance: The School had another positive outcome financially for fiscal 2008-2009 as fund balance in the General Fund increased by $\$ 93,417$. The ending FY 09 fund balance was $\$ 813,967$ as of June 30, 2009. The ending fund balance represents about $30.6 \%$ of expenditures incurred for the year and is an important aspect in the School's financial well being since a healthy fund balance represents things such as
cashflow, as a cushion against unanticipated expenditures, enrollment declines, state aid metering changes, funding deficiencies and aid prorations at the state level and similar problems.

In the audit, there were no transactions entered into by the School during the year for which there is a lack of authoritative guidance or consensus. There were also no significant transactions that have been recognized in the financial statements in a different period than when the transaction occurred.

## FACTORS BEARING ON THE SCHOOL'S FINANCIAL FUTURE

The Math and Science Academy is dependent on the State of Minnesota for its revenue authority. Recent experience demonstrates that legislated revenue increases have not been sufficient to meet instructional program needs and increased costs due to inflation. The Math and Science Academy will strive to maintain its longstanding commitment to academic excellence and educational opportunity for students within a framework of financial fiduciary responsibility.

## Academic Performance

## 2008-2009 Accountability Data

In order to ensure that academic progress is being made, MSA students are required to take all state mandated standardized tests throughout the year. This testing includes the Basic Standard Skills Tests in $8^{\text {th }}$ and $10^{\text {th }}$ grade, for those who have yet to pass, and the newly established MCA II exams in $6^{\text {th }}, 7^{\text {th }}, 8^{\text {th }}, 9^{\text {th }}, 10^{\text {th }}$ and $11^{\text {th }}$ grade. In addition, MSA administers the PSAT to all students in grades 9 through 11. For the last four years, MSA has had at least one student competing as a national merit semifinalist. In 2004-2005 MSA was granted permission by the Minnesota Department of Education (MDE) to use the PSAT results as its new independent benchmark for progress. In other words, each year MSA students in grades 9 through 11 are given the PSAT in the fall, and when the test results are reported in December, scores are compared to previous years, as well as to all sophomores and juniors nationwide. This was the fifth year the PSAT was used as a benchmark for reading, writing and math, and these are the scores to which all subsequent years will continue to be compared.

Without exception, each year since MSA opened in fall of 1999, we have outperformed not only the mandated testing state averages, but also the scores of all the surrounding schools in South Washington County, the Metro area as a whole, and the majority statewide.

## PSAT Test Data

The PSAT scores, as they are listed below, represent our $9^{\text {th }}, 10^{\text {th }}$, and $11^{\text {th }}$ graders across the areas of reading, writing, and math compared on a national norm expressed in a percentile. Critical reading, math, and writing skills percentiles differ by grade levels. Performance of juniors and above is compared with that of juniors nationwide; the performance of sophomores and below is compared with that of sophomores nationwide.

Selection index percentile compares performance of all students, regardless of grade level, with that of juniors nationwide.

| Graduating Class of <br> 2009 | Critical <br> Reading | Math | Writing <br> Skills | Selection <br> Percentile | Year-to-year <br> \% Increase |
| :---: | :---: | :---: | :---: | :---: | :---: |
| As 11 $^{\text {th }}$ Graders | $\mathbf{7 6 \%}$ | $\mathbf{7 5 \%}$ | $\mathbf{7 3 \%}$ | $\mathbf{7 8 \%}$ | $\mathbf{1 1 \%}$ |
| As 10 $^{\text {th }}$ Graders | $\mathbf{8 3 \%}$ | $\mathbf{7 3 \%}$ | $\mathbf{7 6 \%}$ | $\mathbf{6 7 \%}$ | $\mathbf{1 9 \%}$ |
| As 9 $^{\text {th }}$ Graders | $\mathbf{6 6 \%}$ | $\mathbf{5 6 \%}$ | $\mathbf{6 2 \%}$ | $\mathbf{4 8 \%}$ | NA |

## Operation Performance and Best Practices

The MSA opened its doors in the fall of the 1999 school year and has been a leading example of excellence in public education from that school year forward. The school is standards-driven and collaboratively run. The curriculum places emphasis in the areas of math and science; however, the students also benefit from a well balanced academic program that includes cross curriculum activities, the arts, extra-curricular activities, etc. When students are interviewed, it is clear that they appreciate attending MSA, the whole package from facility, to school environment of respect, academic quality, and a caring and highly qualified school faculty. MSA students desire to be no other place.

In order to graduate, every student at MSA is required to complete a math program through calculus and a high school science program that includes biology, chemistry, and physics. Rigorous school standards are expected, shared, reinforced, and appreciated.

Not only does MSA stress such core curriculum areas as math, science, English, social studies, and world language, but also boasts a music program that participates in the Twin Cities "J-Train" program and has a full time music instructor that expanded the program to include choir and a string orchestra. MSA curriculum and standards also include a full time health program and a full time physical education program in cooperation with the Southeast Area YMCA.

After the regular school day, MSA students can further enhance their educational experience by participating in a variety of after school extracurricular activities appropriate for a secondary level school, including a Minnesota State High School League (MSHSL) cross country team, a MSHSL Nordic Ski team, a MSHSL boys basketball team, a MSHSL baseball team, a MSHSL track team as well as club level recreational sports such as girl's basketball, academic teams, theater, orchestra and jazz band, National Honor Society, Student Council, Academic Triathlon, Lego league robotics, Robotics FIRST in addition to Spanish club, art club, and other various school-sponsored social events.

MSA is also a model charter school for best practices in school management and governance. School leaders are often relied upon to serve as presenters, peer leaders, and mentors at MDE training opportunities. Sponsor MDE also relies on MSA to be a leader and mentor among our own "team of ten" MDE-sponsored schools. MSA leaders and faculty are always willing and able to serve upon request.

Finally, this past year, MSA had the honor and privilege of being one of the top performing schools in the State of Minnesota, as well as having received two U.S. News \& World Report's "America's Best High Schools" Bronze Awards, a Minnesota Academic Excellence Foundation (MAEF) Spotlight Award, and a National No Child Left Behind (NCLB) Blue Ribbon School for 2008-2009.

MSA is intended to be a community created and operated school, and as such, has a well-organized parent team. The Parent Team is an official committee of the MSA Board of Directors (BOD) and provides a means for parents to meet together and work to support MSA. The Parent Team also provides a forum for parent discussion and can be a mechanism for developing recommendations for the BOD. All parents and guardians of MSA students are automatically members of the Parent Team and are invited to attend meetings regularly scheduled meetings.

The Parent Team organizes parent volunteer efforts, provides funding for activities, and supports various student and school activities. However, the Parent Team does not participate in general fundraisers or sales of food or merchandise. Instead, all families are asked to make a contribution to the Parent Team of $\$ 35$ if they have one child or $\$ 50$ if they have more than one child at MSA. These funds are used for activities that are not provided for by the general education budget. Some activities that have received financial support from the Parent Team in the past include various school clubs and teams, the annual school play, prom, teacher
conference dinners, MOL Day, Pi Day, transportation for field trips, school landscaping, all-school assemblies, and Lego robotics.

2008-2009 Parent Team Officers: Chairperson: Sue Kratz<br>Volunteer Coordinator: Jeni Crump<br>Secretary: Amy Sunderman<br>Treasurer: Lori Nixon

MSA also solicits input from its families by issuing an annual family satisfaction survey. The data generated from this survey indicates that parents are quite pleased with MSA. MSA appeals to families because it is a small school governed by teachers and families. At MSA, parents are empowered to make a difference in their child's education. Parents also like to point out the positive social aspects for their students, in that their students are able to find friendships with others who value a good education and attend school with the expectation to learn.

## Program Challenges

Once again an issue for MSA (not unlike many charter schools) is the lack of traditional public school interest in entering into cooperative agreements with respect to Minnesota High School League activities. MSA has worked through and with the Minnesota Association of Charter Schools (MACS) and the state legislature in an attempt to gain a compromise resolution but once again failed in the 2009 legislature. For the 2009-2010 school year, MSA will continue to lobby lawmakers and the Minnesota State High School League to find an equitable solution to this dilemma. MSA will also attempt to work directly with the surrounding districts to secure cooperative extracurricular agreements.

Another issue, which is more unique to our program, is that of expansion and in particular, lack of expansion resources. MSA has researched and pursued an expansion agenda for two years. The result of this effort has been the realization that there is no funding source for a successful, suburban math and science program. In other words, while there is start-up funding for new programs, funding for the demographically defined disadvantaged, and funding for large traditional programs, there is no funding for small successful programs such as ours. To meet this challenge, MSA has submitted, and has had an alternative site policy approved by MDE. The 2009-2010 school year will be used as a planning year to decide how best to address lack of classroom space, as well as issues of revenue short falls by planning for an additional site.

However, our greatest challenge, comes from the lack of adequate yearly funding. For the 2009-2010 school year specifically, this issue is only made larger due to the shortfall in cash flow as a result in the increase in educational hold-back to $27 \%$. With double digit increases in fixed costs such as health benefits and utilities, it will soon become increasingly impossible to provide a quality-uniform education to our students with only one or two percent yearly increase in formula aid. Our only revenue protection has been the addition of students to our program (of which we have a great number waiting), but this too has become problematic in a finite space such as ours.

## Other School Accountability Data

See Appendix A - Parent Survey

## Current Academic Goals

MSA leadership and school sponsor, MDE, are in agreement that defining clear, specific, measurable goals is an area that MSA has improved in the past year and will continue to improve in the next contract term. The contract goals and outcomes are listed below. As such, only the $\mathbf{8}^{\text {th }}$ grade math goal is yet unmet.

## MSA Academic Goals:

By 2011, $85 \%$ of $8^{\text {th }}$ grade students will meet or exceed the state standards on the MCA II math test. $20098^{\text {th }}$ Grade MCA Math Test results $\mathbf{- 8 1 . 8 1} \%$

* By 2011, $95 \%$ of $8^{\text {th }}$ grade students will meet or exceed the state standards on the MCA II reading test. 2009 8 $^{\text {th }}$ Grade MCA Reading Test results $\mathbf{- 9 6 . 3 6 \%}$
- By 2011, $100 \%$ of $9^{\text {th }}$ grade students will meet their graduation testing requirement by meeting or exceeding the writing standards on the MCA II test.
2009 9 $^{\text {th }}$ Grade MCA Writing Test results $\mathbf{- 1 0 0 \%}$
- By 2011, $100 \%$ of $10^{\text {th }}$ grade students will meet their graduation testing requirement by meeting or exceeding the reading standards on the MCA II test.
2009 10 ${ }^{\text {th }}$ Grade MCA Reading Test Results - 100\%
- By 2011, $90 \%$ of $11^{\text {th }}$ Grade students will meet their graduation testing requirement by meeting or exceeding the math standards on the MCA II test.
2009 11 $^{\text {th }}$ Grade MCA Math Test Results - 91.3\%
\$ Using PSAT scores and data, students in grade 9-11 will increase their over-all selection percentile from year to year. (See previously report PSAT data table)

Other Student/School Program Goal: During each academic year, teachers will develop and participate in school-wide staff development that supports and sustains academic gains in writing, reading, math, and science goals toward the year 2011.

## Innovative Practices and Implementation

One of the most significant contributing factors in student academic performance is the effectiveness of classroom instruction. 100 percent of MSA teachers are Highly Qualified (2009 School Report Card) and fully dedicated to continuous improvement. With quality instruction in mind, the MSA pay scale and staff policies all center on professional development and advancing educational best practices. MSA faculty are encouraged to seek professional development and leadership opportunities (internal and external to MSA) in their academic fields and are monetarily rewarded for their accomplishments.

For example, 80 percent of the MSA teaching staff received supplemental pay for participating in and fully completing the school-wide staff development activity for the 2008-09 school year as evidenced by teachers jointly developing an interdisciplinary lesson plans and then delivering that lesson to students (e.g. math \& social, English/writing \& science, etc).

MSA teachers are required to align their curriculum with both state standards, and in the case of science, national standards. MSA curriculum and instruction is modified as needed by individual teachers and with the guidance and oversight of the MSA board of Directors, and is based on data-driven decision making. For example, when our students performed poorly on the statistical concepts part of the MCA math exam, we inserted both a unit on statistics into our 6th grade math curriculum and began teaching a separate statistics course for more advanced students who have already progressed passed the 6th grade curriculum.

At MSA, teachers drive staff development decisions in cooperation with the director and the MSA board. The staff development program relies on teachers identifying an annual academic goal for improvement, and then taking the lead to select subject area experts who will then carry out the actual training process. A somewhat unique characteristic of MSA is our use of internal faculty experts in the design and implementation of this process. Annually in the fall, teachers collectively engage in a "needs assessment" discussion and state assessment data for the prior school year is one of the factors taken into consideration. Other needs that have been considered include advancing the use of technology in the classroom and increasing team and interdisciplinary instruction. This discussion immediately precedes the composing of the annual school-wide staff development plan. The school-wide staff development plan is then specifically designed and facilitated by
internal faculty experts and to support and sustain the aforementioned MSA goals and annual student academic gains in writing, reading, math, and science.

MSA has a proven record of providing a rigorous and successful education program for all students. Based on the 2009 School Report Card, MSA has met $100.0 \%$ of the requirements for Adequate Yearly Progress under No Child Left Behind. Due to the relatively small size of MSA (approximately 285 students in grades 6-12), it has been less relevant for us to disaggregate our student data within the typical demographic categories of ethnicity, gender, or educational program. The advantage of our small school size is that MSA staff are able to sufficiently "drill-down" to the individual student data. It is our practice to specifically identify and address the needs of individual students not making adequate progress. The positive result of this is clearly reflected in the successful performance of MSA 9-11th grade students on the state-required graduation assessments.

## Future Plans

Currently, the Math and Science Academy (MSA) facilities plan covers a building of fourteen classrooms over approximately 22,000 square feet. The building was designed and built as a school for 265 MSA students, grades $6^{\text {th }}-12^{\text {th }}$, and does generally meet our needs; save that of our physical education program, where we lease space at the local YMCA. In the spring of 209 the MSA Board of Directors applied for and received permission for an additional site. Notwithstanding the actual details that re currently under discussion, an additional MSA site/facility will ideally be located in South Washington County School District \#833 thereby keeping the separation of buildings and program to a minimum as well as to not disrupt our current transportation partnership with the local school district. An additional school site/facility plan will essentially separate the high school grades $9^{\text {th }}$ through $12^{\text {th }}$ into a separate campus from the $6^{\text {th }}$ through $8^{\text {th }}$ graders. For example, our first choice for expansion would be in the vacant 4.5 acre lot adjacent to our current facility. Though, after initial research, this option may prove to be quite expensive. However, the 3M Company has a number of vacant and near vacant buildings throughout the city of Woodbury, easily within a five mile radius of our current location; and it is the city of Woodbury that would be our first choice of locations as to again maintain our current transportation partnership with the local school district.

## Sponsor Information

Since opening in the fall of 1999, The Math and Science Academy, has been one of a few charter schools in the state to have the Department of Education (MDE) for a sponsor. Early in the 2006-2007 school year, Stephanie Olsen replaced Andrea Coffey as our MDE sponsor liaison, and has since been actively involved in monitoring our operation. She has diligently and conscientiously worked to organize workshops on governance, standardized testing, and test score analysis. As a school, MSA has been fortunate in that since our second year, we have had no significant issues that have kept MSA from renewing our 3-year sponsor contract, which has now been renewed through the 2010-2011 school year.
Beginning in 2008-2009, our MDE sponsor liaison has conducted at least two site visits annually, including attending at least one MSA board meeting annually. Our sponsor will also make an effort to attend a sampling of MSA student activities and concerts. Our sponsor will also review our Annual Report and Audit, as well as monitor MSA compliance with school reporting requirements. Our sponsor will continue to review the MSA annual budget and school performance on the State Report Card annually. Our sponsor will also continue to regularly review MSA board meeting minutes, and monitor school policy revisions as needed.

## Minnesota Department of Education

Sponsor Liaison: Stephanie Olsen<br>Sponsor Contact Information: 651-582-8348

Contract Termination Date: June 30, 2011

## GENERAL STATEMENT OF ENROLLMENT

It is the Math and Science Academy's policy to provide equal educational opportunity for all students. The Math and Science Academy does not unlawfully discriminate on the basis of race, color, creed, religion, national origin, sex, marital status, parental status, status with regard to public assistance, disability, sexual orientation or age. The Math and Science Academy also makes reasonable accommodations for disabled students.

## Admission requirements.

The Math and Science Academy may limit admission to:
(1) pupils within an age group or grade level;
(2) people who are eligible to participate in the graduation incentives program under section 124D.68; or
(3) residents of a specific geographic area where the percentage of the population of
non-Caucasian people of that area is greater than the percentage of the non-Caucasian population in the congressional district in which the geographic area is located, and as long as the school reflects the racial and ethnic diversity of the specific area.
The Math and Science Academy shall enroll an eligible pupil who submits a timely application, unless the number of applications exceeds the capacity of a program, class, grade level, or building. In this case, pupils will be accepted by lot. If the Math and Science Academy is the only school located in a town serving pupils within a particular grade level, then pupils that are residents of the town will be given preference for enrollment before accepting pupils by lot. If a pupil lives within two miles of a charter school and the next closest public school is more than five miles away, the Math and Science Academy will give those pupils preference for enrollment before accepting other pupils by lot. The Math and Science Academy shall give preference for enrollment to a sibling of an enrolled pupil and to a foster child of that pupil's parents before accepting other pupils by lot. The Math and Science Academy may not limit admission to pupils on the basis of intellectual ability, measures of achievement or aptitude, or athletic ability.
