Course Offerings

Design the Future - Ms. Luedtke Afternoons only - 12:00-2:30pm

Why wonder what changes the future will hold when you can be the one making those changes! In this class, you'll learn the principles of design, which can be used for any kind of creative work, from designing a product to a game to an idea to an experience! Then, you'll learn the skills of strategic foresight, or how to use clues from the present to forecast the future. We'll put those two skill sets together to design for the future, having fun playing games, building things, and imagining together.

Drivers Education - Driver's Education Inc. Morning (9:00-11:30am) and Afternoon (12:00-2:30pm) Sessions June 13 - June 30; Mondays - Thursdays Only

Classes will be offered only June 13 - June 30, 2022, both in the morning and afternoon. Please see the attached registration form for specific information around cost and times. There will be a fee of \$399 to register for Drivers Education. Please fill it out and return it to the office in building B by May 18, 2022.

Camp Crafts - Ms. McClernan
Mornings only - 9:00-11:30am
June 13 - July 1 Only

Welcome to Camp Craft. In this course you will learn how to enjoy expressing how you feel through a variety of art experiences. You will have a chance to design and create many different visually appealing and artistic projects. Projects could include:

1. Monster Pillows
2. Inspirational Rocks to share around the neighborhood
3. Mask Making
4. Photo Self Portraits
5. Balloon Pop Art
6. Mural Painting

We hope to see you there!!!

Forensic Science - Ms. Froberg
Morning (9:00-11:30am) and Afternoon (12:00-2:30pm) Sessions

This course is designed to give students an overview of Forensic Science and see how crime scenes are investigated. Some topics we may cover are; observation skills, CSI and evidence collection, hair analysis, fibers and textiles, fingerprints, DNA profiling, blood and blood spatter and casts/impressions. At the end of the course, students will be evaluated on a giant "crime scene" where they can apply the skills they learned throughout the course.

Adventures in Mapping - Ms. Rubenzer
Mornings only - 9:00-11:30am

Learn how to read, use, and make maps all while having fun and doing lots of hands-on activities! Students will learn important mapping and navigational skills while taking part in activities like scavenger hunts, geocaching, and more.

From Mayans to Minnesotans: Interactive History - Ms. Metcalf
Morning (9:00-11:30am) and Afternoon (12:00-2:30pm) Sessions

In this summer adventure, you will learn how society has been having fun since the very beginning. From making and playing traditional Chinese and Mayan street games, creating our own paper and catapults, and discovering Minnesota Art at the History Center, this summer course will have you living with history. Get your hands ready to build your way through history.

¡Más español, por favor! - Ms. Babb

Morning (9:00-11:30am) and Afternoon (12:00-2:30pm) Sessions

Do you feel like you "lose" your Spanish over the summer? Are you looking for a way to keep in practice with listening, reading, writing, and speaking? Join us this summer as we practice our Spanish and review what we learned throughout the school year through music, TV shows, short stories, and lots of hands-on activities!

Games Galore - Ms. Bomberg

Morning (9:00-11:30am) and Afternoon (12:00-2:30pm) Sessions

June 13 - July 1 Only

Put down your phones and get ready for some old school fun! In this course, we will be playing a variety of games including board games, word games, math games, strategy games and more! Through playing games, your child will improve their critical thinking skills and boost languages and teamwork skills. Feel free to bring your favorite non-technology based games to teach your friends or play one of the many games provided!

Solving the Mystery of Shakespeare - Mr. J. Hoemann

Morning (9:00-11:30am) and Afternoon (12:00-2:30pm) Sessions

July 11-July 22 Only

A lot of people think acting Shakespeare is one of the hardest things to succeed at, but instructor Jackson Hoemann is here to show you that it's actually pretty easy, all you have to do is crack his secret codes! Through a combination of acting games, reading sections from the plays, text analysis, and on-your-feet acting of famous scenes from Shakespeare's plays, students will be able to understand and perform the work of one of history's greatest playwrights, while having plenty of fun doing so!

Student Magazine - Ms. Bransford

Morning (9:00-11:30am) and Afternoon (12:00-2:30pm) Sessions

Are you interested in learning more about journalism? Writing for a magazine is a unique skill that requires targeting an audience, writing with intention and purpose, and incorporating visual elements and photographs into a pleasing layout. In this course, we will study the basics of writing long-form journalism, and then work together as a class to design, write, produce, and disseminate an original magazine.

Robotic Conception - Mr. Langseth

Mornings Only - 9:00 - 11:30am

In this course, students will learn about how robots work and are created. They will problem solve and create a working robot. We will start with some projects with LEGO Mindstorms and then move on to creating robots using Arduinos. As time permits, students may also be able to incorporate 3D printing in their own robot designs.
