

Math Course Progression at Math and Science Academy

To meet MSA's graduation requirements, students must complete Calculus or AP Calculus AB by the end of their senior year.

AP Statistics and AP Calculus BC are elective courses.

To help you determine if you are on track to graduate, find your current course placement and count up to 12th grade following the black arrows. If you reach calculus before 12th grade or exactly at 12th grade, you are on track to meet MSA's graduation requirement for math.

The red lined path is an alternative route for students who meet certain criteria.

If you do not reach calculus based on your current math placement, please contact Mariah Smith (msmith@mnmsa.org).
